

# MOD STYLE

Mod style has been a part of British life for more than half a century, shaping men's fashion, music and the general mood of UK youth culture. In that time, the look has changed a lot, but the core components of the Mod way of life have remained steadfast: the clothes are sharp, well cut and considered; the attitude is forward-thinking, aspirational and with its finger on the pulse; there's an overarching desire to stand out from the crowd that underpins it all.

# WGSN A/W 25/26 men's footwear trends

## The Haptic shoe

**The Haptic Shoe:** Constructed from sustainable materials such as sheepskin leather or **faux fur** made from recycled **PET/biobased fibers** to achieve a soft, plush tactile effect (HyperTexture). The color palette follows Neutral Refresh tones, complemented by memory foam or specialized insoles for enhanced comfort. The design includes a foldable counter-heel for #TwoMileWear and a squared toe shape to create a distinctive fashion statement.

## The distressed lace-up

**The Distressed Lace-Up:** Made from high-quality, durable materials including responsibly sourced leather, **alternative leathers**, or **recycled/low-impact PU**, featuring an extremely distressed finish. Design details emphasize cracks and creases around the toe box, with layered coloring to add dimensionality, inspired by collaborations such as Supreme x Dr. Martens. The style is further reinforced with recycled metal hardware, belt-like strap details (Beltification), chunky soles, a large rounded toe, and welted edges to enhance both visual impact and ruggedness.
