— **Advanced Qualitative Research Methodology**

Data Overview

The most important steps in qualitative research are collecting reliable data (must verify data), data analysis techniques, and writing a summary report.

- 03.** QR definition
- 05.** Design
- 07.** methodology
- 08.** Qualitative data Analysis
- 09.** Workshop 01
- 10.** Workshop 02
- 11.** Publication in International Journals

Content Analysis

When to use: to define, classify typical terms, expression and concepts in qualitative data. [1]

- In content analysis, **frequency** is a key factor for drawing meaningful conclusions.
- Content analysis is a research method used to identify, quantify, and analyze patterns.
- The researcher can draw conclusions about the content's meaning, prospective impact, and even the intentions behind it. [2]

WHAT IS QUALITATIVE RESEARCH?

Qualitative research is a type of research that explores and provides deeper insights into real-world problems.^[3] Qualitative research gathers participants' experiences, perceptions, and behavior.^[4] Qualitative research is one of the methods in social science research. A main purpose of the method is to describe relationships between people and societies.^[5] Qualitative research is especially effective in obtaining culturally specific information about the values, opinions, behaviors, and social contexts of particular populations.^[6] Qualitative research is a type of research that aims to gather and analyse non-numerical (descriptive) data in order to gain an understanding of individuals' social reality, including understanding their attitudes, beliefs, and motivation.^[7] The primary purpose of conducting qualitative research is to understand the individual's thoughts, feelings, opinions, and reasons behind these emotions.^[8] Qualitative research is concerned with feelings, ideas, or experiences.^[9]

— **Advanced Qualitative Research Methodology**

What is qualitative research?

In conclusion,

...A qualitative research is a description of the relationship between people and society, insights into real-world problems, social context, understanding of cultural anthropology, behavior, feeling, experience, perception, ideas, attitude, opinion, understanding beliefs, and motivation...

searching, studying, and proving social phenomenon or human behaviors.

Qualitative Research Methods

INTRODUCTION

Reliability of Qualitative Data

Data verification for reliability of qualitative data usually uses triangulation.

- Triangulation of theory
- Triangulation of data
- Triangulation by investigators
- Triangulation of methodology

- Member Check
- Peer examination
- Participatory team
- Researcher's bias
- Long-term observation

Merriam, S.B. (1998)[14]

QUALITATIVE RESEARCH APPROACHES

Data Analysis interpretation, Content analysis, Thematic analysis, Textual analysis, Document analysis and Discourse analysis [15]

Differences between Thematic Analysis & Content Analysis in Table [16].

DESIGN

Approach	When to use	Focus	Interpretation	Example/Analyze
Content analysis	- To define, classify typical terms, expression and concepts in qualitative data.	<u>manifest content</u>	<u>descriptive method</u>	To determine the data code used to describe the cause of the problem, Solutions, Social Support and New concept by the researcher's interpretation <ul style="list-style-type: none"> • count the frequency of specific words or phrases in Questionair and Interview form.
Thematic analysis	To locate, recognize, and interpret themes and patterns in qualitative data.	<u>latent content</u>	<u>interpretive method</u>	To investigate how the psychological impact of children caused by domestic violence affects changes in learning and aggressive behavior towards society in the future. <ul style="list-style-type: none"> • delve deeper into the underlying reasons behind customer opinions.

METHODOLOGY QUALITATIVE DATA COLLECTION METHODS

QUALITATIVE DATA ANALYSIS

RESULTS

codes/meanings

Problems	Obstacles	Suggestions
P1: Don't have free time	O1: Work every day	S1: Must focus on communication and public relations in the community frequently
P2: Don't have information	O2: Leaders focus only on their own group	
P3: Without the participation of the people	O3: The event place is too far away	S2: There should be transportation to and from the event and compensation provided.
P4: There is no car to go to the activity and no money		

- People **do not have free time**, **work every day**, and **do not have information from leaders**, so they must focus on communication and public relations in the community frequently.

O2 Leaders focus only on their own group, **without the participation of the people in the community.**

O3 - The event place is too far away. *Participants should have the use of a shuttle service or be compensated for their travel expenses for participating in the event.* [Researchers must interpret the meaning of this issue.]

Integrated Innovative Design for Elderly Professions towards Public Participation:
A Case Study of Wat Pracharabuedham Community, Dusit District, Bangkok. [18]

Creating a brief qualitative data overview that highlights significant concepts.

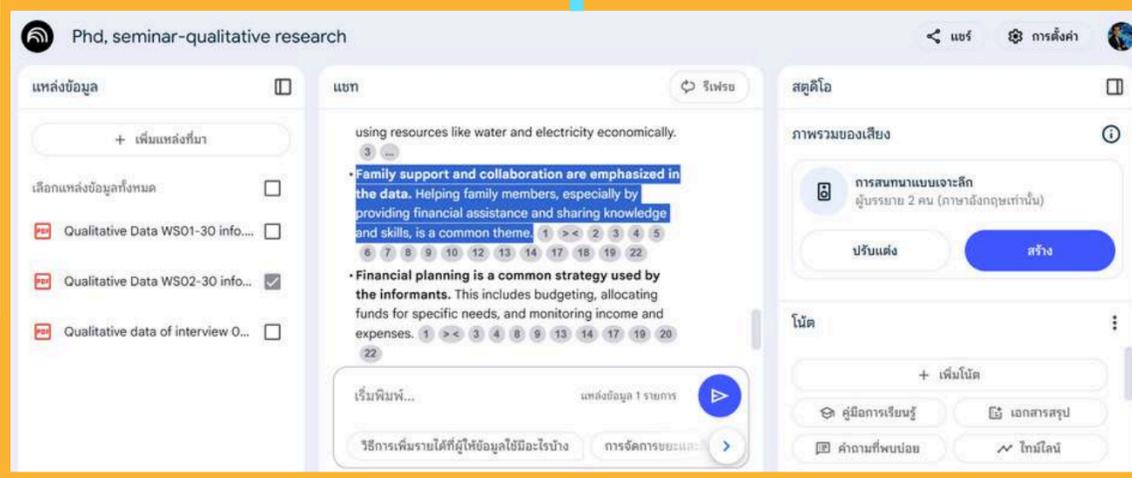

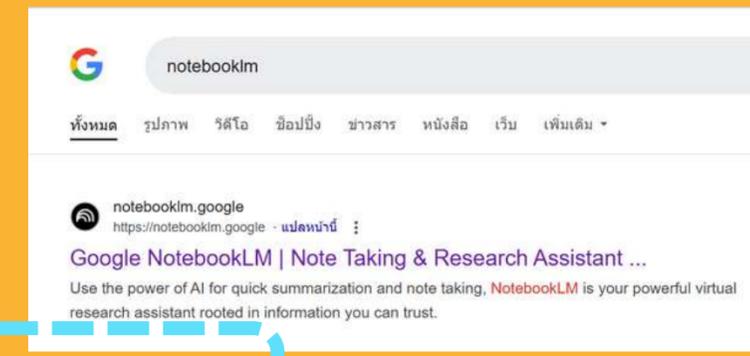

Currently, it is regarded to be the best AI program for researchers.

Important Themes

- **Saving money** is crucial for those who follow the philosophy of sufficiency economy. The data frequently mention saving practices such as depositing money in banks and piggy banks.
- **Self-sufficiency** is a prominent theme. Many informants practice raising animals, growing vegetables, and farming to achieve self-sufficiency.
- **Family support and collaboration** are emphasized in the data. Helping family members, especially by providing financial assistance and sharing knowledge and skills, is a common theme.

Manuscripts have different writing styles (templates) depending on the journal.

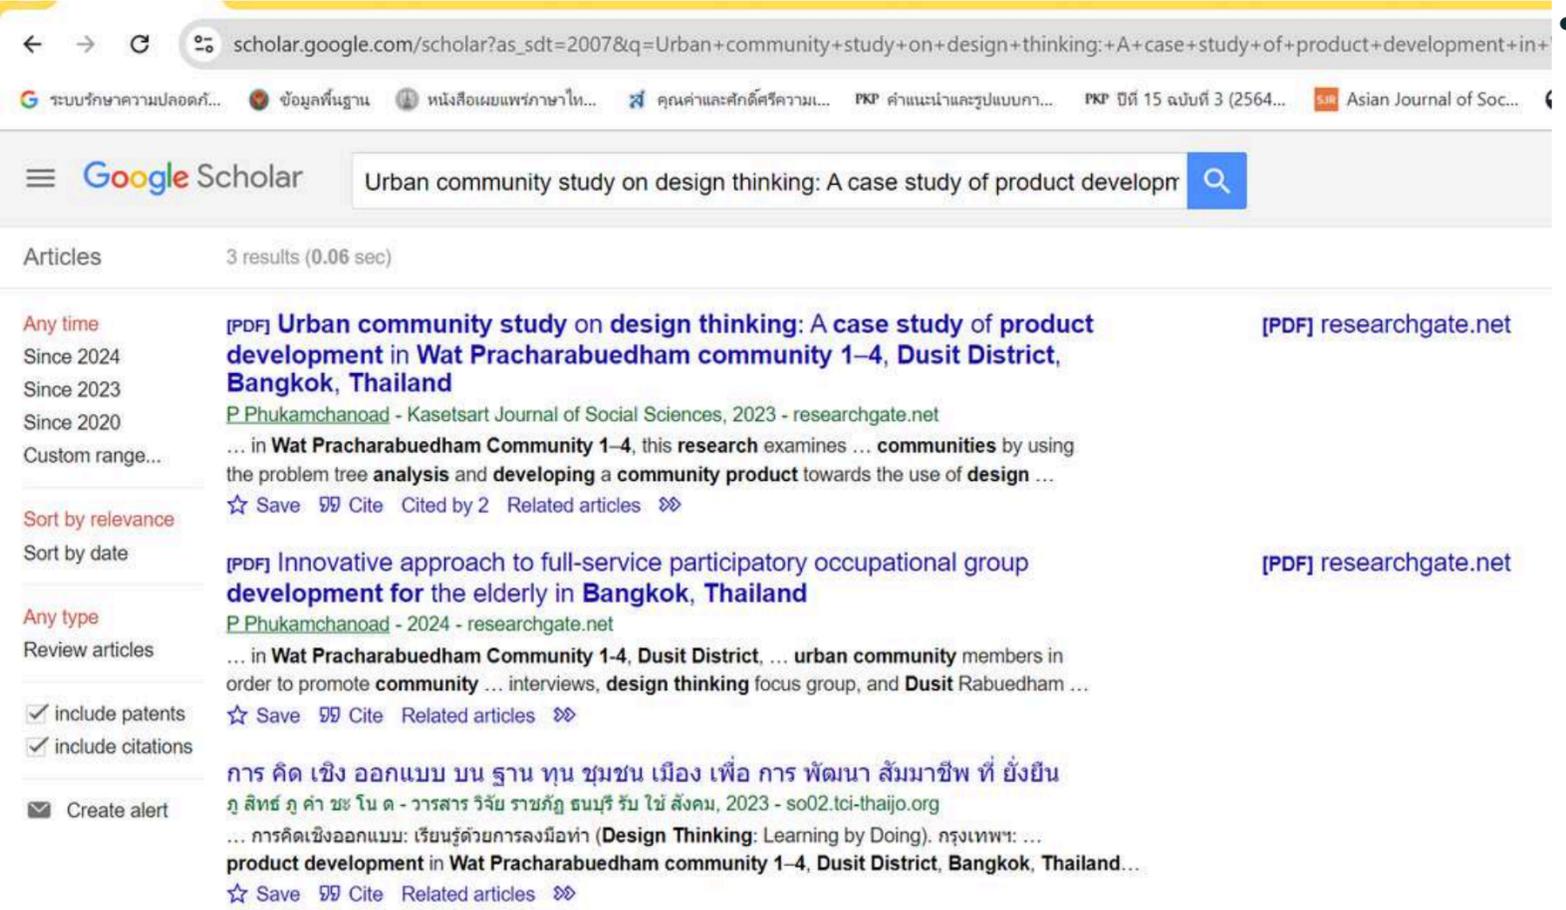

IMPORTANT POINTS OF SUCCESS

🔍 **TITLE NAME** ✕

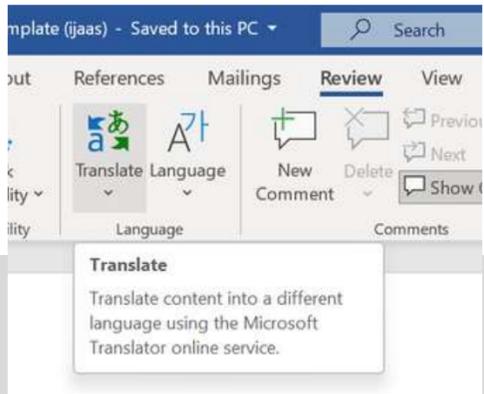

Is an editor's first judgment to accept or reject anything for publication in their journal based mostly on the title?

The title is without doubt the part of a paper that is read the most, and it is usually read first. A good title contains the main idea or ideas of your study and/or purpose of your research paper. [22]

- If the title is too long, unnecessary words must be eliminated.
- Choose academic words that are well-known worldwide rather than local words.

We can use the QuillBot AI program to change the research title for a variety of purposes.

[22] Sacred Heart University Library. (2024). Organizing Academic Research Papers: Choosing a Title. <https://library.sacredheart.edu/c.php?g=29803&p=185911#:~:text=The%20title%20summarizes%20the%20main,it%20is%20usually%20read%20first.>

The innovative approach to sufficiency economy in Thailand's Northeastern region provinces [27]

The methods section describes actions taken to investigate a research problem and the rationale for the application of specific procedures or techniques used to identify, select, process, and analyze information applied to understanding the problem, thereby, allowing the reader to critically evaluate a study's overall validity and reliability. The methodology section of a research paper answers two main questions: How was the data collected or generated? And, how was it analyzed? The writing should be direct and precise and always written in the past tense. [25] In the social and behavioral sciences, it is important to always provide sufficient information to allow other researchers to adopt or replicate your methodology. This information is particularly important when a new method has been developed or an innovative use of an existing method is utilized. [26]

For major doctoral degrees, methods for conducting mixed quantitative and qualitative research include 1) population and sample, 2) research tools, 3) gathering data, and 4) data analysis.

The innovative approach to sufficiency economy in Thailand's Northeastern region provinces
The goal of this study is to explore the innovative approach to Sufficiency Economy at a household level. The data was collected by the use of questionnaires with 2,000 respondents as well as the interviews with...

METHODOLOGY

IMPORTANT POINTS OF SUCCESS

Readers need to know how the data in your paper was gathered.

Urban community study on design thinking: A case study of product development in Wat Pracharabuedham community 1-4, Dusit District, Bangkok, Thailand

Phusit Phukamchanoad

Department of Social and Cultural Development Management, Faculty of Humanities and Social Sciences, Suan Sunandha Rajabhat University, Bangkok 10300, Thailand

The primary data were collected by the use of questionnaires, interviews, and focus group discussions. The data were used for identifying problems, brainstorming, and developing a prototype for practical product development. [29]

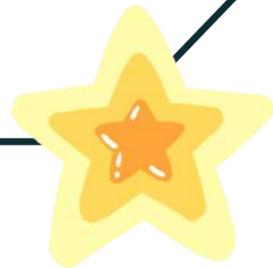

The data collection process was designed in correspondence with the five steps of the design thinking process as follows; Step 1: 'Empathize' Step 2: 'Define' Step 3: 'Ideate' Step 4: 'Prototype' Step 5: 'Testing'

[29] Phukamchanoad, P. (2023). Urban community study on design thinking: A case study of product development in Wat Pracharabuedham community 1-4, Dusit District, Bangkok, Thailand. phusit.ph@ssru.ac.th

THE RESULTS MUST FULLY DESCRIBE THE OBJECTIVES.

IMPORTANT POINTS OF SUCCESS RESULTS AND DISCUSSION

Results: This section should describe the outcome of the study. Data should be presented as concisely as possible and, if any, in the form of tables and figures, although very large tables should be avoided.

Discussion: The discussion should be an interpretation of the results and their meaning with reference to other authors' work. [30]

[31]

Pracharabuedham Community 1-4 was established to accommodate commercial buildings and flats, known as Wat Pracharabuedham Community 4.

By 2021, Wat Pracharabuedham Community 1-4 had transformed into urban communities. The area featured a variety of housing styles, including commercial buildings, two-story wooden houses,

hosting religious rituals and community ceremonies, such as New Year's Eve merit-making, the Songkran festival, and other key events (Phukamchanoad, 2023). The primary lifestyle in the communities revolved around the "H-T-S Ecosystem," integrating households, temples, and schools. Other community agencies included village and urban community fund
